

NextVision to be Included in the Tel Aviv-35 Index

NextVision officially joins the TA-35 Index today after its share price increased by more than 2,600% since its IPO

Between 2021 and 2024, the Company's revenues grew by 664% with a continuous improvement in profitability and gross margins reaching over 72%.

Ra'anana, Israel – November 6, 2025 – NextVision Stabilized Systems Ltd. (TASE: NXSX), a leading technology growth company developing, manufacturing, and marketing advanced stabilized day-and-night imaging solutions for aerial and ground platforms, announced today that its shares will be added to the **Tel Aviv-35 Index (TA-35)**, an index which includes the 35 largest public companies traded on the Tel Aviv Stock Exchange.

NextVision's inclusion in Israel's flagship index marks a significant milestone for the company, which went public just four and a half years ago. Since its IPO, the Company's share price has increased by more than 2,600%, reflecting investor confidence in the Company and consistent operational growth. Between 2021 and 2024, NextVision's revenues increased by 664%, while gross profitability improved to over 72%.

Chen Golan, Chairman of NextVision, commented: "Joining the TA-35 Index in less than five years since our IPO is an exciting and symbolic moment for NextVision. It represents how far we've come in a very short time — and the confidence the market places in us. We reached this milestone thanks to our proprietary technology, hard work, determination, and the dedication of every one of our employees."

"The substantial \$414 million capital raise we completed in September 2025 will allow us to continue our growth momentum — by expanding our production capacity to meet rising demand from customers worldwide and through strategic acquisitions that will drive continued expansion."

"At the same time, we are deepening our presence in key international markets. NextVision has grown at a remarkable pace of several hundred percent since its IPO, maintaining exceptionally high profitability thanks to our flagship products. We plan to continue leading the global market through the development of breakthrough products while operating responsibly, modestly, and with a constant drive for excellence — building a leading Israeli technology company with global impact."

About NextVision Stabilized Systems Ltd.

NextVision is a leading technology company specializing in stabilized imaging systems for aerial and ground platforms, including micro and mini UAVs and drones. The company offers customers a comprehensive imaging solution encompassing a wide range of cameras, complementary accessories, and integrated capabilities for commercial, industrial, and security applications — positioning NextVision as a true 'one-stop shop'.

NextVision has developed a patented image stabilization engine that enables the production of high-performance stabilized cameras with world-class size-to-weight ratios. This technology

ensures stable, high-quality imagery even in demanding flight conditions. The company markets its products worldwide and continues to experience steady growth in its global customer base.
